

An Open Letter from Krishnan Suthanthiran, President & Founder of TeamBest Companies & Best Cure Global Foundation to Medical Professionals Around the World

TeamBest Companies are committed to providing uninterrupted 24/7 service during this critical and difficult time with the global challenges of COVID-19.

In memory of my Father, whom I lost to Cancer in 1968, I launched my Global War on Cancer on April 29th, 2015, as it has been a 50 plus year journey for me to fight cancer. In recognition of this, Harvard Medical School initiated an Annual Conference, starting from 2016 (April 29-30) a Global Cancer Catalyst Summit in Boston, Massachusetts, USA. I have been a Keynote Speaker each of the past four years at this conference.

TeamBest Companies and I have attended and exhibited at ASTRO Annual meetings every year from 1976. I am the only one in the world who has attended every ASTRO annual meeting since 1976. TeamBest Companies have been supporting ASTRO, by exhibiting in all ASTRO annual meetings, many of the refresher courses (when allowed to exhibit), and advertising in every issue of ASTROnews, Practical Radiation Oncology (PRO) and the International Journal of Radiation Oncology • Biology • Physics (Red Journal).

TeamBest Companies have been pioneers and innovators for more than six decades, not only in Radiation Therapy for benign and malignant diseases for cancer with many of the technologies being used today, but also pioneers in the treatment of Coronary Vascular Restenosis for Cardiac patients. TeamBest Companies products and technologies have been saving millions of lives annually for more than six decades.

Best Wishes,

Krishnan Suthanthiran

Best™ Particle Therapy is Developing a Highly Revolutionary New Treatment for Cancer Therapy

In the next couple of years, Best Particle Therapy will introduce our unique 400 MeV ion Rapid Cycling Medical Synchrotron (iRCMS) with variable energy, heavy ion treatment technologies, offering Proton-to-Carbon heavy ion, for highly precise, conformal and hypo-fractionated radiation therapy. This will be the most advanced new technology for Cancer therapy, enhancing the cure for many millions of Cancer patients, who do not have this option currently.

Best™ Particle Therapy System
Single Room to Multi-Room, Proton-to-Carbon
Variable Energy with or without Gantries

The advantages of the Best 400 MeV iRCMS are:

- Intrinsically small beams facilitating beam delivery with precision
- Hypo-fractionated radiation therapy
- Small beam sizes – small magnets, light gantries – smaller footprint
- Highly efficient single turn extraction with less shielding
- Flexibility – heavy ion beam therapy (protons and/or carbon), beam delivery modalities

* Best iRCMS is under development and not available for sale currently.
